Modern Electro Plating: The Principles Involved in Depositing Gold, Silver, Nickel, Copper, Brass and Other Metals, by Means of Batteries or Dynamos; ... Baths, Chemicals Used, Etc (Classic Reprint) J. H. Van Horne
Excerpt from Modern Electro Plating: The Principles Involved in Depositing Gold, Silver, Nickel, Copper, Brass and Other Metals, by Means of Batteries or Dynamos; The Preparation and Management of Plating Baths, Chemicals Used, Etc

This little work has been prepared chiefly to help out of his difficulties the plater in country towns who has purchased a small outfit and begun operations without previous training in a plating establishment where modern methods have been employed with a due regard for speed and economy in turning out the work. Hence it has been thought best to confine our remarks chiefly to the principles involved in the work, and to tell in a common sense way, how the work is done; what forces are employed; how they are handled, and how the various formulae may be made and varied to suit the conditions of the work or to overcome the difficulties that may arise in continuous working of solutions.

It has seemed better to do this than to give a large number of formulae which, although they may be perfectly adapted to a special purpose, contain in themselves no real information, but have to be taken blindly, like a physician's prescription for a fever.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
