Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management

Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management
Increasing evidence suggests that the composition and spatial configuration – the pattern – of forest landscapes affect many ecological processes, including the movement and persistence of particular species, the susceptibility and spread of disturbances such as fires or pest outbreaks, and the redistribution of matter and nutrients. Understanding these issues is key to the successful management of complex, multifunctional forest landscapes, and landscape ecology, based on a foundation of island bio-geography and meta-population dynamic theories, provides the rationale to deal with this pattern-to-process interaction at different spatial and temporal scales. This carefully edited volume represents a stimulating addition to the international literature on landscape ecology and resource management. It provides key insights into some of the applicable landscape ecological theories that underlie forest management, with a specific focus on how forest management can benefit from landscape ecology, and how landscape ecology can be advanced by tackling challenging problems in forest (landscape) management. It also presents a series of case studies from Europe, Asia, North America, Africa and Australia exploring the issues of disturbance, diversity, management, and scale, and with a specific focus on how human intervention affects forest landscapes and, in turn, how landscapes influence humans and their culture. An important reference for advanced students and researchers in landscape ecology, conservation biology, forest ecology, natural resource management and ecology across multiple scales, the book will also appeal to researchers and practitioners in reserve design, ecological restoration, forest management, landscape planning and landscape architecture.

From reader reviews:

Armando McFarland:

Reading a guide can be one of a lot of action that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new info. When you read a guide you will get new information simply because book is one of several ways to share the information or maybe their idea. Second, looking at a book will make an individual more imaginative. When you reading through a book especially fictional works book the author will bring you to definitely imagine the story how the figures do it anything. Third, you may share your knowledge to other people. When you read this Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management, you may tells your family, friends along with soon about yours e-book. Your knowledge can inspire others, make them reading a publication.

Jack Nguyen:

Can you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you find out the inside because don't judge book by its cover may doesn't work is difficult job because you are scared that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer might be Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management why because the amazing cover that make you consider with regards to the content will not disappoint you. The inside or content will be fantastic as the outside or maybe cover. Your reading 6th sense will directly make suggestions to pick up this book.

Cheryl Lopez:

Beside this kind of Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management in your phone, it might give you a way to get nearer to the new knowledge or data. The information and the knowledge you will got here is fresh through the oven so don't be worry if you feel like an previous people live in narrow community. It is good thing to have Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management because this book offers for your requirements readable information. Do you at times have book but you don't get what it's all about. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss it? Find this book and also read it from at this point!

Glenn Connelly:

As we know that book is very important thing to add our knowledge for everything. By a book we can know everything you want. A book is a list of written, printed, illustrated as well as blank sheet. Every year has been exactly added. This reserve Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management was filled regarding science. Spend your free time to add your knowledge about your science competence. Some people has diverse feel when they reading a new book. If you know how big selling point

of a book, you can sense enjoy to read a guide. In the modern era like now, many ways to get book which you wanted.
