The Art of Genes: How Organisms Make Themselves Enrico Coen

Over the past twenty years there has been a revolution in biology--for the first time scientists have been able to unravel the details of how organisms make themselves. The mechanisms by which a fertilized egg develops into an adult can now be grasped in a way that was unimaginable a few decades ago. *The Art of Genes* is the first account of these exciting new findings, and of their broader significance in how we view ourselves.
Through a highly original synthesis of sciece and art, Enrico Coen vividly describes this revolution in our understanding of how plants and animals develop. Drawing on a wide range of material--from flowers growing petals instead of sex organs, and flies that develop an extra pair of wings, to works of art by Leonardo and Magritte--he explains in lively accessible prose the meaning of genes. Coen draws parallels between the way genes respond to the developing pattern of an organism and the way an artist responds to a painting being created on canvas, a memorable analogy that shows how the organism develops through an interactive dialogue in which there is no separation between plan and execution.
There have been many attempts to resolve the paradox of how organisms make themselves. Lucid, authoritative, and entertaining, *The Art of Genes* offers fresh and exciting insights into the nature of evolution, development, and human creativity.

Tammy Medina:

Playing with family in the park, coming to see the marine world or hanging out with pals is thing that usually you might have done when you have spare time, then why you don't try thing that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love The Art of Genes: How Organisms Make Themselves, you can enjoy both. It is great combination right, you still need to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't understand it, oh come on its called reading friends.

Nicholas Ko:

As a pupil exactly feel bored to be able to reading. If their teacher asked them to go to the library or even make summary for some book, they are complained. Just minor students that has reading's heart and soul or real their leisure activity. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring as well as can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this The Art of Genes: How Organisms Make Themselves can make you sense

more interested to read.
