Freenet Steve Stanton
“A non-stop, furiously paced story.” — Robert Charles Wilson, award-winning author

A nuanced story about artificial intelligence and digital immortality, *Freenet* plunges readers into the far future, when humans have closed distances in time and space through wormhole tunnels between interplanetary colonies. Consciousness has been digitized and cybersouls uploaded to a near-omniscient data matrix in a world where information is currency and the truth belongs to whoever has the greatest bandwidth.

When Simara Ying crash-lands on the desert planet Bali, she finds herself trapped in a cave-dwelling culture with no social network for support. Her rescuer, Zen Valda, is yanked into a new universe of complications he can scarcely grasp and into an infinite network of data he never knew existed. When brash V-net anchorman Roni Hendrik starts investigating how Simara became the subject of an interplanetary manhunt, he finds a dangerous emergence in the network that threatens all human life.

***Freenet* is an exciting new novel about the power of information, as well as the strength of love, in a post-digital age.**
