At the Leading Edge: The ATLAS and CMS LHC Experiments Green Dan
Too often descriptions of detectors focus on the "what" and not the "why". This volume aims to elucidate how the requirements of the physics at the Large Hadron Collider (LHC) define the detector environment. In turn, the detector choices are made to adopt to that environment. The goal of LHC physics is to explore the mechanism for electroweak symmetry breaking. Because of the minuscule cross-sections which need to be explored, 0.1 fb, the LHC needs to provide 100 fb^{-1}/yr, or an instantaneous luminosity of 1034 / (cm2 sec). With a bunch crossing interval of 25 nsec, well matched to detector speeds, there will be 25 events occupying each bunch crossing.

Thus the physics requires fast, finely segmented, low noise and radiation resistant detectors which provide redundant measurements of the rarely produced electrons and muons. To achieve those goals, new ground was broken in constructing the A Toroidal LHC ApparatuS (ATLAS) and Compact Muon Solenoid (CMS) detectors in the vertex detectors, tracking systems, calorimetry, strong magnets, muon systems, front end electronics, trigger systems, and in the data acquisition methods used.

From reader reviews:

Stan Whitley:

What do you concentrate on book? It is just for students because they are still students or this for all people in the world, what the best subject for that? Just you can be answered for that question above. Every person has several personality and hobby for every single other. Don't to be obligated someone or something that they don't would like do that. You must know how great and important the book At the Leading Edge: The ATLAS and CMS LHC Experiments. All type of book could you see on many options. You can look for the internet options or other social media.

Kenneth Sigler:

Spent a free time for you to be fun activity to do! A lot of people spent their spare time with their family, or their particular friends. Usually they undertaking activity like watching television, going to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? May be reading a book is usually option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to test look for book, may be the publication untitled At the Leading Edge: The ATLAS and CMS LHC Experiments can be good book to read. May be it is usually best activity to you.

Virgie Haynes:

Many people spending their time frame by playing outside along with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to invest your whole day by studying a book. Ugh, ya think reading a book can actually hard because you have to take the book everywhere? It okay you can have the e-book, taking everywhere you want in your Mobile phone. Like At the Leading Edge: The ATLAS and CMS LHC Experiments which is keeping the e-book version. So , why not try out this book? Let's notice.

Hector Medlin:

As a pupil exactly feel bored to reading. If their teacher asked them to go to the library in order to make summary for some e-book, they are complained. Just little students that has reading's heart or real their interest. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading really. Any students feel that looking at is not important, boring as well as can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this At the Leading Edge: The ATLAS and CMS LHC Experiments can make you feel more interested to read.
