Davide Geneletti

Handbook on Biodiversity and Ecosystem Services in Impact Assessment (Research Handbooks on Impact Assessment series) Davide Geneletti
This Handbook presents state-of-the-art methodological guidance and discussion of international practice related to the integration of biodiversity and ecosystem services in impact assessment, featuring contributions from leading researchers and practitioners the world over. Its multidisciplinary approach covers contributions across five continents to broaden the scope of the field both thematically and geographically.

A multifaceted variety of case studies provide examples of the use of information on biodiversity and ecosystem services in different types of impact assessment to improve decisions at all levels, from strategic choices to individual projects. In addition to its discussion of how biodiversity and ecosystem services can improve the salience and effectiveness of impact assessment, this Handbook presents a range of applications and possible solutions to challenges in key policy and planning sectors, including urban development, land use, energy, marine areas, infrastructure, agriculture, forestry, health and tourism.

This Handbook's combination of cutting-edge literature and methodological guidance supports researchers, practitioners and students in developing and implementing biodiversity and ecosystem services-inclusive impact assessment processes, which can contribute to better decisions about the use of our lands and waters. As such it will appeal not only to scholars of impact assessment but of environmental sciences, environmental engineering, natural sciences, planning and economics as well.
