Products of Groups (Oxford Mathematical Monographs)

Bernhard Amberg, Silvana Franciosi, Francesco de Giovanni

Products of Groups (Oxford Mathematical Monographs) Bernhard Amberg, Silvana Franciosi, Francesco de Giovanni
Groups comprising two subcomponents are of particular interest to group theorists who want to know in what way the structure of the product is related to that of its subgroups. This monograph gives the first detailed account of the most important results of group product research from the past 35 years. Although the emphasis is on infinite groups, relevant theorems about finite products of groups are also proved. This book will be of interest to research students and specialists in group theory, and will be useful in seminars or as a supplement in courses in general group theory. A special chapter on conjugacy and splitting theorems obtained by means of the cohomology of groups has never before appeared in book form.

From reader reviews:

Toni Styer:

Now a day those who Living in the era where everything reachable by talk with the internet and the resources within it can be true or not need people to be aware of each facts they get. How many people to be smart in acquiring any information nowadays? Of course the reply is reading a book. Reading through a book can help individuals out of this uncertainty Information specifically this Products of Groups (Oxford Mathematical Monographs) book as this book offers you rich info and knowledge. Of course the details in this book hundred per cent guarantees there is no doubt in it you probably know this.

Hazel Gannon:

Information is provisions for people to get better life, information today can get by anyone at everywhere. The information can be a expertise or any news even a problem. What people must be consider when those information which is in the former life are difficult to be find than now is taking seriously which one is suitable to believe or which one the actual resource are convinced. If you obtain the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All those possibilities will not happen inside you if you take Products of Groups (Oxford Mathematical Monographs) as your daily resource information.

Ronald Malone:

Is it you who having spare time and then spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Products of Groups (Oxford Mathematical Monographs) can be the respond to, oh how comes? A book you know. You are so out of date, spending your extra time by reading in this brand-new era is common not a geek activity. So what these textbooks have than the others?

Michael Madden:

As a university student exactly feel bored for you to reading. If their teacher inquired them to go to the library as well as to make summary for some reserve, they are complained. Just small students that has reading's heart or real their passion. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring as well as can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Products of Groups (Oxford Mathematical Monographs) can make you experience more interested to read.
