Chimpanzees in biomedical and behavioral research constitute a national resource that has been valuable in addressing national health needs. Facilities that house chimpanzees owned and supported by the National Institutes of Health (NIH) have successfully met the research requirements of the scientific community. The captive chimpanzee population in the United States has grown substantially, particularly over the last decade. That growth is due primarily to the success of the NIH-sponsored Chimpanzee Breeding and Research Program, which achieved the birth numbers thought necessary to meet the projected needs of biomedical research. However, the expected level of use of the chimpanzee model in biomedical research did not materialize, and that has created a complex problem that threatens both the availability of chimpanzees for research in the future and the infrastructure required to ensure the well-being of captive chimpanzees used in biomedical research.

Because the present system is fragmented, it is impossible to formulate an accurate overview of the size and nature of the chimpanzee population. But, if the chimpanzee is to continue to be used in biomedical research responsibly, effectively, and cost-effectively, we must be able to oversee, track, and coordinate the maintenance and use of chimpanzees and to control the size of the population. To assess the long-range situation and to develop, implement, and monitor the application of policies for the proper use and care of chimpanzees, an authoritative, centralized oversight structure is imperative. Once it is in place, it will be possible to refine and implement this report's recommendations.

From reader reviews:

Gerald Warfield:

Book will be written, printed, or highlighted for everything. You can know everything you want by a reserve. Book has a different type. To be sure that book is important factor to bring us around the world. Adjacent to that you can your reading skill was fluently. A publication Chimpanzees in Research: Strategies for Their Ethical Care, Management, and Use (Compass Series) will make you to be smarter. You can feel more confidence if you can know about everything. But some of you think this open or reading a book make you bored. It is far from make you fun. Why they can be thought like that? Have you searching for best book or suitable book with you?

Danny Saleem:

The book Chimpanzees in Research: Strategies for Their Ethical Care, Management, and Use (Compass Series) has a lot of information on it. So when you check out this book you can get a lot of profit. The book was published by the very famous author. The writer makes some research previous to write this book. That book very easy to read you may get the point easily after reading this article book.

Brandon Giles:

You may spend your free time you just read this book this publication. This Chimpanzees in Research: Strategies for Their Ethical Care, Management, and Use (Compass Series) is simple to create you can read it in the recreation area, in the beach, train along with soon. If you did not have much space to bring the actual printed book, you can buy often the e-book. It is make you better to read it. You can save often the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

Karen Johnson:

A lot of people said that they feel uninterested when they reading a e-book. They are directly felt the idea when they get a half portions of the book. You can choose often the book Chimpanzees in Research: Strategies for Their Ethical Care, Management, and Use (Compass Series) to make your personal reading is interesting. Your own skill of reading skill is developing when you including reading. Try to choose easy book to make you enjoy to read it and mingle the idea about book and reading through especially. It is to be initially opinion for you to like to start a book and study it. Beside that the e-book Chimpanzees in Research: Strategies for Their Ethical Care, Management, and Use (Compass Series) can to be your brand new friend when you're feel alone and confuse in what must you're doing of the time.
