Laboratory Manual Main Version for McKinley's Anatomy & Physiology

Christine Eckel, Theresa Bidle

Laboratory Manual Main Version for McKinley's Anatomy & Physiology Christine Eckel, Theresa Bidle
The study of human anatomy and physiology really comes to life in the anatomy and physiology laboratory, where students get hands-on experience with human cadavers and bones, classroom models, preserved and fresh animal organs, histology slides of human tissues, and learn the process of scientific discovery through physiology experimentation. This lab manual is intended to provide students with tools to make the subject matter more relevant to their own bodies and to the world around them. It is an interactive workbook for students: a ‘how-to’ guide to learning human anatomy and physiology through touch, dissection, observation, experimentation, and critical thinking exercises.
