Reasoning with Rules and Precedents: A Computational Model of Legal Analysis

Luther Branting

Reasoning with Rules and Precedents: A Computational Model of Legal Analysis Luther Branting
Few areas of human expertise are so well understood that they can be completely reduced to general principles. Similarly, there are few domains in which experience is so extensive that every new problem precisely matches a previous problem whose solution is known. When neither rules nor examples are individually sufficient, problem-solving expertise depends on integrating both. This book presents a computational framework for the integration of rules and cases for analytic tasks typified by legal analysis. The book uses the framework for integrating cases and rules as a basis for a new model of legal precedents. This model explains how the theory under which a case is decided controls the case's precedential effect. The framework for integrating rules and cases is implemented in Grebe, a system for legal analysis. The book presents techniques for representing, indexing, and comparing complex cases and for converting justification structures based on rules and case into natural-language text.
This book will interest researchers in artificial intelligence, particularly those involved in case-based reasoning, artificial intelligence and law, and formal models of argumentation, and to scholars in legal philosophy, jurisprudence, and analogical reasoning.

From reader reviews:

David Smith:

Nowadays reading books are more than want or need but also get a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge even the information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want have more knowledge just go with training books but if you want truly feel happy read one with theme for entertaining for example comic or novel. The Reasoning with Rules and Precedents: A Computational Model of Legal Analysis is kind of book which is giving the reader erratic experience.

Candice Foushee:

This book untitled Reasoning with Rules and Precedents: A Computational Model of Legal Analysis to be one of several books that best seller in this year, this is because when you read this book you can get a lot of benefit upon it. You will easily to buy this book in the book store or you can order it through online. The publisher of this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Mobile phone. So there is no reason for your requirements to past this guide from your list.

John McGinnis:

The e-book untitled Reasoning with Rules and Precedents: A Computational Model of Legal Analysis is the guide that recommended to you to study. You can see the quality of the publication content that will be shown to you actually. The language that writer use to explained their way of doing something is easily to understand. The article writer was did a lot of study when write the book, therefore the information that they share for your requirements is absolutely accurate. You also can get the e-book of Reasoning with Rules and Precedents: A Computational Model of Legal Analysis from the publisher to make you much more enjoy free time.

Mark Bock:

Reading can called mind hangout, why? Because when you find yourself reading a book especially book entitled Reasoning with Rules and Precedents: A Computational Model of Legal Analysis your brain will drift away trough every dimension, wandering in each and every aspect that maybe unknown for but surely can become your mind friends. Imaging each word written in a book then become one form conclusion and explanation which maybe you never get prior to. The Reasoning with Rules and Precedents: A Computational Model of Legal Analysis giving you yet another experience more than blown away your thoughts but also giving you useful data for your better life in this era. So now let us show you the relaxing pattern here is your body and mind will be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary spending spare time activity?
