If a naturalist uses the term of big cats, this usually will be talking about the four different kinds of cats that can roar, and these four different kinds of cats are very different in size from each other, and they also live in different places in the world. The first fact about all these big cats is that they are all carnivores, which means meat eaters, and this means that they do out hunting for their food a good deal of the time. The second fact about big cats is that they belong to a family group called the genus Panther and in the Panther group you will find lions, tigers, leopards, and jaguars. The third fact about big cats is that they unlike smaller cats do prefer to eat their food while they are laying down. The forth fact about big cats is that they mainly do their hunting at night, but there are some species of these big cats that do hunt only during the day. The fifth fact about big cats is they are very powerful climbers the big cats is no other than the leopard. The leopard is able to carry any prey up a tree, which is sometimes twice its own weight.
