**The Universal Computer: The Road from Leibniz to Turing** Martin Davis

The breathtakingly rapid pace of change in computing makes it easy to overlook the pioneers who began it all. Written by Martin Davis, respected logician and researcher in the theory of computation, **The Universal Computer: The Road from Leibniz to Turing** explores the fascinating lives, ideas, and discoveries of seven remarkable mathematicians. It tells the stories of the unsung heroes of the computer age – the logicians.

The story begins with Leibniz in the 17th century and then focuses on Boole, Frege, Cantor, Hilbert, and Gödel, before turning to Turing. Turing's analysis of algorithmic processes led to a single, all-purpose machine that could be programmed to carry out such processes—the computer. Davis describes how this incredible group, with lives as extraordinary as their accomplishments, grappled with logical reasoning and its mechanization. By investigating their achievements and failures, he shows how these pioneers paved the way for modern computing.

Bringing the material up to date, in this revised edition Davis discusses the success of the IBM Watson on *Jeopardy*, reorganizes the information on incompleteness, and adds information on Konrad Zuse. A distinguished prize-winning logician, Martin Davis has had a career of more than six decades devoted to the important interface between logic and computer science. His expertise, combined with his genuine love of the subject and excellent storytelling, make him the perfect person to tell this story.

**From reader reviews:**

**Cindy Johnson:**

Reading a publication tends to be new life style with this era globalization. With reading you can get a lot of information that could give you benefit in your life. Together with book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story as well as their experience. Not only situation that share in the ebooks. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on earth always try to improve their expertise in writing, they also doing some analysis before they write for their book. One of them is this The Universal Computer: The Road from Leibniz to Turing.

**Wanda Sousa:**

Do you have something that you want such as book? The publication lovers usually prefer to select book like comic, quick story and the biggest you are novel. Now, why not trying The Universal Computer: The Road from Leibniz to Turing that give your satisfaction preference will be satisfied by reading this book. Reading addiction all over the world can be said as the way for people to know world better then how they react toward the world. It can't be explained constantly that reading behavior only for the geeky man or woman but for all of you who wants to be success person. So , for all of you who want to start looking at as your good habit, you may pick The Universal Computer: The Road from Leibniz to Turing become your starter.

**Richard Lawrence:**

Is it a person who having spare time subsequently spend it whole day through watching television programs or just lying on the bed? Do you need something totally new? This The Universal Computer: The Road from Leibniz to Turing can be the solution, oh how comes? A fresh book you know. You are consequently out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these books have than the others?

**Robert Vargas:**

Don't be worry should you be afraid that this book will probably filled the space in your house, you could have it in e-book way, more simple and reachable. That The Universal Computer: The Road from Leibniz to Turing can give you a lot of close friends because by you looking at this one book you have thing that they don't and make you actually more like an interesting person. This particular book can be one of one step for you to get success. This guide offer you information that might be your friend doesn't learn, by knowing more than some other make you to be great persons. So , why hesitate? Let's have The Universal Computer: The Road from Leibniz to Turing.
