Attack and Defend Computer Security Set Dafydd Stuttard, Marcus Pinto, Michael Hale Ligh, Steven Adair, Blake Hartstein, Ozh Richard
Defend your networks and data from attack with this unique two-book security set

The *Attack and Defend Computer Security Set* is a two-book set comprised of the bestselling second edition of *Web Application Hacker's Handbook* and *Malware Analyst's Cookbook*. This special security bundle combines coverage of the two most crucial tactics used to defend networks, applications, and data from attack while giving security professionals insight into the underlying details of these attacks themselves.

The *Web Application Hacker's Handbook* takes a broad look at web application security and exposes the steps a hacker can take to attack an application, while providing information on how the application can defend itself. Fully updated for the latest security trends and threats, this guide covers remoting frameworks, HTML5, and cross-domain integration techniques along with clickjacking, framebusting, HTTP parameter pollution, XML external entity injection, hybrid file attacks, and more.

The *Malware Analyst's Cookbook* includes a book and DVD and is designed to enhance the analytical capabilities of anyone who works with malware. Whether you're tracking a Trojan across networks, performing an in-depth binary analysis, or inspecting a machine for potential infections, the recipes in this book will help you go beyond the basic tools for tackling security challenges to cover how to extend your favorite tools or build your own from scratch using C, Python, and Perl source code. The companion DVD features all the files needed to work through the recipes in the book and to complete reverse-engineering challenges along the way.

The *Attack and Defend Computer Security Set* gives your organization the security tools needed to sound the alarm and stand your ground against malicious threats lurking online.
