Relic Tech (Crax War Chronicles) (Volume 1) Terry W Ervin II
The Silicate War has been over for fifteen years, and the tension among the dominant galactic races is growing. Many fear that the Umblegarri, the ancient alien race that ushered humanity into the interstellar galactic community during the Silicate War, have been targeted for conquest by the Crax and their allies. It’s no longer speculation. The invasion is underway and Kra finds himself strapped to a hospital bed, critically injured and surrounded by hostile corporate lawyers, high ranking military and intelligence officials, ambitious members of the criminal justice apparatus, and an Umbelgarri diplomat. All are demanding answers or their pound of flesh. Krakista Keesay, a Class 4 Security Specialist, doesn’t have the answers they demand. Why did he sabotage a top secret research facility? What was he doing on a quarantined planet? Why did he set up the civil transport Kalavar for destruction? Is that all? Not even close. Kra turns to his only option: Allow his brain to be hooked up to an experimental device so that he might prove his innocence. Or lose his mind.
