Social Robots: Boundaries, Potential, Challenges (Emerging Technologies, Ethics and International Affairs)

Marco Nørskov

Social Robots: Boundaries, Potential, Challenges (Emerging Technologies, Ethics and International Affairs) Marco Nørskov
Social robotics is a cutting edge research area gathering researchers and stakeholders from various disciplines and organizations. The transformational potential that these machines, in the form of, for example, caregiving, entertainment or partner robots, pose to our societies and to us as individuals seems to be limited by our technical limitations and phantasy alone. This collection contributes to the field of social robotics by exploring its boundaries from a philosophically informed standpoint. It constructively outlines central potentials and challenges and thereby also provides a stable fundament for further research of empirical, qualitative or methodological nature.
