A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics

Peter Hilton, Jean Pedersen

A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics Peter Hilton, Jean Pedersen
This easy-to-read book demonstrates how a simple geometric idea reveals fascinating connections and results in number theory, the mathematics of polyhedra, combinatorial geometry, and group theory. Using a systematic paper-folding procedure it is possible to construct a regular polygon with any number of sides. This remarkable algorithm has led to interesting proofs of certain results in number theory, has been used to answer combinatorial questions involving partitions of space, and has enabled the authors to obtain the formula for the volume of a regular tetrahedron in around three steps, using nothing more complicated than basic arithmetic and the most elementary plane geometry. All of these ideas, and more, reveal the beauty of mathematics and the interconnectedness of its various branches. Detailed instructions, including clear illustrations, enable the reader to gain hands-on experience constructing these models and to discover for themselves the patterns and relationships they unearth.

From reader reviews:

Rose Rowe:

Book is to be different for every grade. Book for children until finally adult are different content. As you may know that book is very important for people. The book A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics had been making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The guide A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics is not only giving you much more new information but also being your friend when you truly feel bored. You can spend your personal spend time to read your guide. Try to make relationship together with the book A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics. You never really feel lose out for everything when you read some books.

Lila Smith:

Information is provisions for people to get better life, information currently can get by anyone with everywhere. The information can be a expertise or any news even restricted. What people must be consider if those information which is inside former life are difficult to be find than now's taking seriously which one works to believe or which one typically the resource are convinced. If you get the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen inside you if you take A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics as your daily resource information.

Roger Everman:

Reading a book to get new life style in this season; every people loves to examine a book. When you learn a book you can get a lots of benefit. When you read guides, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your examine, you can read education books, but if you want to entertain yourself look for a fiction books, this sort of us novel, comics, as well as soon. The A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics will give you new experience in looking at a book.

Deborah Young:

You could spend your free time to see this book this publication. This A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics is simple to develop you can read it in the area, in the beach, train as well as soon. If you did not get much space to bring the printed book, you can buy the actual e-book. It is make you better to read it. You can save the actual book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
